## About the Science, Technology & Innovation Festival

The National Commission on Research, Science and Technology (NCRST) as Namibia's agency on research and development, responsible for the co-ordination, monitoring and supervision of research, science and technology in Namibia – initiated an annual Science, Technology and Innovation Festival to promote public understanding of science, technology and innovation. The emphasis of the Festival is on innovation and creativity, applied sciences and technology, with the main aim of promoting science and technology to the public, especially the youth. As well as to demystify popular misconceptions and create a new mind set about engineering, science and technology; and allow scientist the opportunity to make science accessible to all people.

### Objectives:

- Stimulate awareness and interest in science, technology and innovation
- Showcase and encourage innovation and creativity
- Enhance the teaching and learning of mathematics, science, and technology at secondary school level
- Encourage learners in junior secondary schools especially the girl child to pursue studies in mathematics, science, and technology subjects
- Drive more learners towards science, technology, and innovation careers
- Promote science education projects already functioning in the country
- Create a science, technology, and innovation showcase platform for stakeholders in the private and public sectors

### What to Expect:

Exhibitions

Interactive Demonstrations

Interactive Science Workshops

Science Shows and Games

Challenges and Competitions

Academic Talks and Plenaries

Prizes and Giveaways

Science Slam Café
